U kunt nu uw thuis wifi netwerk selecteren. Onder de kolom SSID kunt u uw wifi naam zoeken. In de kolom onder RSSI ziet u de sterkte van het signaal, lopend van 1 tot 100. Wees er zeker van dat dit signaal minimaal 30 is om een stabiele verbinding te krijgen. Klik daarna op OK.

Stap 8

Vul het wachtwoord in in de balk achter "password" en klik op save.

Het bovenstaande scherm verschijnt. U kunt nu de browser afsluiten.

Op het scherm van uw omvormer kunt u controleren of de wifi in stand is gebracht. Druk op de ENTER toets om in het menu te komen. Gebruik de pijlen om "Wifi Info" te selecteren en druk op enter om te bevestigen. Gebruik de pijlen om een IP adres te vinden. Is dit iets anders dan 0.0.0.0 (Bijvoorbeeld 192.168.1.98), dan is de omvormer correct verbonden met het internet.
